- Native enforcement mechanisms
- Jurors agree to a code of conduct
- Each court produces an oracle for disputes
- As disputes are successfully resolved, judgements will become more authoritative
- Courts have a hierarchical structure
- At the very top of this structure is a central authority that encodes the community values

Maria

Characteristics

- Decentralized courts
 - Native enforcement mechanism for the AN
 - Jurors agree to a code of conduct by putting up collateral
 - Each court produces an oracle feed of judgements on subjective disputes
 - As disputes are successfully resolved jurors earn reputation, judgements will become more consistent
 - Courts have a hierarchical structure
 - At the very top of this structure is a supreme court that enforces and encodes the community values of the Aragon Network

A stack of colorful sticky notes is placed on a metal stand. The stack consists of a yellow sticky note on top, followed by a red sticky note, and a stack of multi-colored sticky notes (rainbow colors) at the bottom. The stand is made of polished metal and has a cylindrical base. The background is dark and out of focus.

DRIVERS

OBSTACLES

DRIVERS

OBSTACLES

A stack of green and yellow sponges is shown against a black background. A bright green sticky note is attached to the top sponge, with the word "DRIVERS" written in black marker. To the right, a red sticky note is partially visible, and a stack of rainbow-colored sticky notes is placed on top of the sponges. The entire arrangement sits on a metallic, brushed metal surface.

DRIVERS

A stack of colorful socks (yellow, green, and blue) is shown. A bright yellow sticky note is attached to the top sock, with the word "DRIVERS" written in black marker. To the right, a red sticky note is partially visible. In the foreground, a small stack of rainbow-colored sticky notes is placed on a metallic, brushed-silver surface. The background is dark and out of focus.
